## U.S. CONSUMER SURVEY

## Perceptions and Preferences of Soy Products

## Economic Impact of Competing Soy Investment Alternatives

Jayson Lusk, Trey Malone and Brandon McFadden

## Survey structure

- Selection Tasks:
-1-pound package of burger patties varying by the source of protein/ingredient
-32-ounce bottle of soybean oil varying by label
- Consumer Perceptions
- Taste, Protein Content, Healthfulness and Environmental Friendliness

## Sample details \& demographics

| Variable | Level | Proportion of the sample |
| :---: | :---: | :---: |
| Gender |  |  |
|  | Female | 52.42 |
|  | Male | 47.58 |
| Generation Age |  |  |
|  | Silent (1928-45) | 6.50 |
|  | Boomers (1946-64) | 30.67 |
|  | Generation X (1965-80) | 24.67 |
|  | Millennials (1981-96) | 23.50 |
|  | Generation Z (1997-2012) | 14.67 |
| Income |  |  |
|  | \$34,999 and below | 30.17 |
|  | \$35,000-\$99,999 | 44.33 |
|  | \$100,000 and above | 25.50 |
| Region of residence |  |  |
|  | Northeast | 18.67 |
|  | Midwest | 19.00 |
|  | South | 35.00 |
|  | West | 27.33 |

## First Selection Task:

## 1-pound package of burger patties

## Experimental Design: 1-pound package of burger patties

- Types of protein/ingredient:
- 100\% Beef
- 100\% Soy
- 100\% Pea
- 50\% Beef / 50\% Soy
- 50\% Beef / 50\% Pea
- 25\% Beef / 75\% Soy
- 25\% Beef / 75\% Pea
- Black Bean \& Mushroom
- Prices varied from $\$ 7$ to $\$ 16$ per pound to represent prices for beef patties to plant-based alternatives

## Experimental Design: 1-pound package of burger patties

Imagine you are grocery shopping for a $\mathbf{1}$-pound package of burger patties, and there are several types of burger patties to choose from.

In the following questions, you will be asked to select which package of burger patties you would choose if grocery shopping. The packages will vary by the type of burger patties and price.

Which l-pound package of burger patties would you choose to purchase?

Black bean
$\delta$
mushroom
$\$ 7$
$\$$

| $100 \%$ beef | I would not <br> choose <br> any of <br> these |
| :---: | :---: |
|  |  |

## Unconditional market shares

- Combined, products containing Soy had more than $16 \%$ of the total market share
- The market share for $50 \%$ Beef / 50\% Soy was significantly higher than any other product containing Soy or Pea protein
- It was not significantly higher than Black Bean \& Mushroom
- The market share for $100 \%$ Soy was significantly higher than 100\% Pea
- There was not a significant difference between market shares for 100\% Soy \& 25\% Beef / 75\% Soy
- "Would not choose any option" had the highest market share
- Likely due to price sensitivity at the prices associated with plant-based alternatives

## Conditional market shares

$\square 50 \%$ Beef / 50\% Soy (12.29\%)

- These market shares are 'conditional' on selecting a product
- Selections of "Would not choose any option" are removed
- Combined, products containing Soy had more than $25 \%$ of the total 'conditional' market share

## New Product Introduction

## Market Scare Scenarios

## Selection of products by gender

- Percentages for a Gender is the proportion of respondents who selected a product within that gender (e.g., 28.60\% of Female respondents selected $100 \%$ Beef \& $7.47 \%$ selected $50 \%$ Beef / $50 \%$ Soy - so the percentages along a row will not sum to $100 \%$ )
- The letters next to the percentages denote significant differences (at $p$-value $<0.05$ ) between Genders within a row (i.e., there is only a significant difference for Black Bean \& Mushroom: there is an A next to the percentage for Female and a B next to the percentage for Male)

| Product | Gender |  |
| :--- | :---: | :---: |
|  | Female | Male |
| $100 \%$ Beef | $28.60^{\mathrm{A}}$ | $28.24^{\mathrm{A}}$ |
|  |  |  |
|  | Male | Female |
| $50 \%$ Beef $/ 50 \%$ Soy | $8.60^{\mathrm{A}}$ | $7.47^{\mathrm{A}}$ |
|  |  |  |
|  | Female | Male |
| Black Bean \& Mushroom | $7.97^{\mathrm{A}}$ | $5.80^{\mathrm{B}}$ |

| Product | Gender |  |
| :--- | :---: | :---: |
|  | Male | Female |
| $50 \%$ Beef / 50\% Pea | $6.81^{\mathrm{A}}$ | $6.48^{\mathrm{A}}$ |
|  |  |  |
|  | Male | Female |
| $25 \%$ Beef $/ 75 \%$ Soy | $4.62^{\mathrm{A}}$ | $3.99^{\mathrm{A}}$ |
|  |  |  |
|  | Male | Female |
| $100 \%$ Soy | $4.25^{\mathrm{A}}$ | $4.23^{\mathrm{A}}$ |
|  |  |  |
|  | Male | Female |
| $25 \%$ Beef / 75\% Pea | $3.85^{\mathrm{A}}$ | $3.28^{\mathrm{A}}$ |
|  |  |  |
|  | Female | Male |
| $100 \%$ Pea | $3.15^{\mathrm{A}}$ | $3.08^{\mathrm{A}}$ |
|  |  |  |
|  | Female | Male |
| Would not choose any option | $34.90^{\mathrm{A}}$ | $34.68^{\mathrm{A}}$ |

## Selection of products by generation age

- Percentages for a Generation Age is the proportion of respondents who selected a product within that generation (e.g., $31.46 \%$ of Generation Z respondents selected $100 \%$ beef \& $13.28 \%$ selected $50 \%$ Beef / $50 \%$ Soy - so the percentages along a row will not sum to 100\%)
- The letters next to the percentages denote significant differences (at $p$-value<0.05) between generations within a row (e.g., for $100 \%$ Beef: the A next to the percentages for Generation Z, Boomers, and Generation X indicates that those are not significantly different; there is a significant difference between Generation Z and Millennials because Generation Z's percentage does not have a B \& Millennial's percentage doesn't have an A)

| Product | Generation Ages |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | Generation Z | Boomers | Generation X | Millennials | Silent |
| $100 \%$ Beef | $31.46^{A}$ | $29.38^{A B}$ | $28.55^{A B C}$ | $26.51^{\mathrm{BC}}$ | $23.56^{\mathrm{C}}$ |
|  |  |  |  |  |  |
|  | Generation Z | Millennials | Generation X | Silent | Boomers |
| $50 \%$ Beef / 50\% Soy | $13.28^{\mathrm{A}}$ | $10.68^{\mathrm{B}}$ | $8.02^{\mathrm{C}}$ | $5.29^{\mathrm{CD}}$ | $4.01^{\mathrm{D}}$ |
|  |  |  |  |  |  |
|  | Millennials | Generation X | Generation Z | Boomers | Silent |
| Black Bean \& Mushroom | $9.04^{\mathrm{A}}$ | $8.53^{\mathrm{A}}$ | $7.46^{\mathrm{AB}}$ | $4.38^{\mathrm{B}}$ | $4.17^{\mathrm{B}}$ |

## Selection of products by generation age canimesed

| Product | Generation Ages |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |

| Would not choose any option | $\begin{aligned} & \text { Silent } \\ & 59.62^{A} \end{aligned}$ | Boomers $52.58^{B}$ | $\begin{gathered} \text { Generation X } \\ 31.29^{\circ} \end{gathered}$ | $\begin{gathered} \text { Millennials } \\ 18.88^{\mathrm{D}} \end{gathered}$ | $\begin{gathered} \text { Generation Z } \\ 17.97^{\mathrm{D}} \end{gathered}$ |

## Selection of products by income

- Percentages for an Income is the proportion of respondents who selected a product within that income range (e.g., $29.52 \%$ of respondents who make $\$ 34,999$ and below selected $100 \%$ Beef $\& 9.25 \%$ selected $50 \%$ Beef / $50 \%$ Soy - so the percentages along a row will not sum to $100 \%$ )
- The letters next to the percentages denote significant differences (at $p$-value<0.05) between income ranges within a row (e.g., for $100 \%$ Beef: the A next to the percentages for $\$ 34,999$ and below and $\$ 35,000-\$ 99,999$ indicates that those are not significantly different; there is a significant difference between those income groups and $\$ 100,000$ and above because $\$ 100,000$ and above had a B but not an A)

| Product | Income |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | $\$ 34,999$ and below | $\$ 35,000-\$ 99,999$ | $\$ 100,000$ and above |  |
| $100 \%$ Beef | $29.52^{\mathrm{A}}$ | $29.39^{\mathrm{A}}$ | $25.45^{\mathrm{B}}$ |  |
|  |  |  |  |  |
| $50 \%$ Beef $/ 50 \%$ Soy | $\$ 34,999$ and below | $\$ 100,000$ and above | $\$ 35,000-\$ 99,999$ |  |
|  | $9.25^{\mathrm{A}}$ | $8.25^{\mathrm{AB}}$ | $7.03^{\mathrm{B}}$ |  |
|  |  |  |  |  |
| Black Bean $\&$ Mushroom | $\$ 100,000$ and above | $\$ 35,000-\$ 99,999$ | $\$ 34,999$ and below |  |

## Selection of products by income (canimea)

| Product | Income |  |  |
| :---: | :---: | :---: | :---: |
|  | \$100,000 and above | \$34,999 and below | \$35,000-\$99,999 |
| 50\% Beef / 50\% Pea | $7.97{ }^{\text {A }}$ | $6.77^{\text {AB }}$ | $5.78{ }^{\text {B }}$ |
|  | \$100,000 and above | \$34,999 and below | \$35,000-\$99,999 |
| 25\% Beef / 75\% Soy | $4.86{ }^{\text {A }}$ | $4.52{ }^{\text {A }}$ | $3.81{ }^{\text {A }}$ |
|  | \$100,000 and above | \$35,000-\$99,999 | \$34,999 and below |
| 100\% Soy | $5.15{ }^{\text {A }}$ | $4.14{ }^{\text {AB }}$ | $3.63{ }^{\text {B }}$ |
|  | \$100,000 and above | \$34,999 and below | \$35,000-\$99,999 |
| 25\% Beef / 75\% Pea | $4.21{ }^{\text {A }}$ | $3.59{ }^{\text {A }}$ | $3.15{ }^{\text {A }}$ |
|  | \$100,000 and above | \$34,999 and below | \$35,000-\$99,999 |
| 100\% Pea | $3.76{ }^{\text {A }}$ | $2.97{ }^{\text {A }}$ | $2.84{ }^{\text {A }}$ |
|  | \$35,000-\$99,999 | \$34,999 and below | \$100,000 and above |
| Would not choose any option | $37.08{ }^{\text {A }}$ | $33.39{ }^{\text {A }}$ | $32.48{ }^{\text {A }}$ |

## Selection of products by region

| Product | Region |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | West | South | Northeast | Midwest |
| $100 \%$ Beef | $30.68^{\mathrm{A}}$ | $29.32^{\mathrm{AB}}$ | $26.40^{\mathrm{BC}}$ | $25.55^{\mathrm{C}}$ |
|  |  |  |  |  |
|  | Northeast | South | West | Midwest |
| $50 \%$ Beef / 50\% Soy | $8.43^{\mathrm{A}}$ | $8.07^{\mathrm{A}}$ | $7.96^{\mathrm{A}}$ | $7.57^{\mathrm{A}}$ |
|  |  |  |  |  |
|  | South | Northeast | West | Midwest |
| Black Bean \& | $7.35^{\mathrm{A}}$ | $7.03^{\mathrm{A}}$ | $6.90^{\mathrm{A}}$ | $6.14^{\mathrm{A}}$ |

- Percentages for a Region is the proportion of respondents who selected a product within that region (e.g., 30.69\% of respondents residing in the West selected $100 \%$ Beef \& 7.96\% selected 50\% Beef / $50 \%$ Soy - so the percentages along a row will not sum to 100\%)
- The letters next to the percentages denote significant differences (at $p$-value<0.05) between regions within a row (e.g., for 100\% Beef: the A next to the percentages for West and South indicates that those are not significantly different; there is a significant difference between West and Northeast because West's percentage does not have a B \& Northeast's percentage doesn't have an A)

## Selection of products by region (animen)

| Product | Region |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | Northeast | South | West | Midwest |
| $50 \%$ Beef / 50\% Pea | $7.42^{\mathrm{A}}$ | $6.70^{\mathrm{A}}$ | $6.44^{\mathrm{A}}$ | $6.03^{\mathrm{A}}$ |
|  |  |  |  |  |
|  | Northeast | Midwest | South | West |
| 25\% Beef / 75\% Soy | $4.85^{\mathrm{A}}$ | $4.82^{\mathrm{A}}$ | $4.26^{\mathrm{A}}$ | $3.58^{\mathrm{A}}$ |
|  |  |  |  |  |
|  | Northeast | South | Midwest | West |
|  | $5.19^{\mathrm{A}}$ | $4.55^{\mathrm{AB}}$ | $4.17^{\text {ABC }}$ | 3.24 C |
|  |  |  |  |  |
|  | South | Midwest | Northeast | West |
|  | $3.96^{\mathrm{A}}$ | $3.73^{\mathrm{AB}}$ | $3.68^{\mathrm{AB}}$ | $2.82^{\mathrm{B}}$ |
|  |  |  |  |  |
|  | Northeast | South | Midwest | West |
|  | $3.57^{\mathrm{A}}$ | $3.36^{\mathrm{A}}$ | $2.74^{\mathrm{A}}$ | $2.74^{\mathrm{A}}$ |
|  |  |  |  |  |

## Conclusions from the First Selection Task

Generation $Z$ and Millennials had the highest selections of 1-pound packages of burger patties containing Soy

Silent or Boomers generally had the lowest selection of products and had the highest selection of "Would not choose any option"

There were few differences in the selection of products across genders, income groups or geographic regions

# Second Selection Task: 

## 32-ounce bottle of soybean oil

## Experimental Design: 32-ounce bottle of soybean oil

- Types of labels:
- 0 Trans Fat
- Cholesterol Free
- Gluten Free
- High Oleic
- Made in the USA
- Organic
- Prices varied from $\$ 3$ to $\$ 5$ per bottle to represent prices for the various labels

## Experimental Design: 32-ounce bottle of soybean oil

Imagine you are grocery shopping for a 32-ounce bottle of soybean oil, and there are several bottles of soybean to choose from.

In the following questions, you will be asked to select which bottle of soybean oil you would choose if grocery shopping. The bottles will vary the product claim and price.

Which 32-ounce bottle of soybean oil would you choose to purchase?

## Unconditional market shares

- The Organic and Made in the USA labels were selected significantly more than the other labels, followed by Cholesterol Free and 0 Trans Fat
- High Oleic was selected the least, showing a need for public awareness campaigns

## Conditional market shares

These market shares are:

- 'Conditional' on selecting a product
- Selections of "Would not choose any option" are removed
- Combined, products containing Soy had more than $25 \%$ of the total 'conditional' market share

## Elasticities

|  |  |
| :--- | :---: |
| Label | Own-Price Elasticity |
| High Oleic | -1.2 |
| Gluten Free | -1.1 |
| Organic | -1.0 |
| Made in the USA | -1.0 |
| Cholesterol Free | -1.0 |
| 0 Trans Fat | -1.0 |

## Selection of products by gender

- Percentages for a Gender is the proportion of respondents who selected a product within that gender (e.g., 19.69\% of Female respondents selected Organic \& 17.67\% selected Made in the USA - so the percentages along a row will not sum to 100\%)
- The letters next to the percentages denote significant differences (at $p$-value $<0.05$ ) between genders within a row (i.e., for Organic: the A next to the percentage for Female and B next to the percentage for Male indicates there is a significant difference; for Made in the USA: the A next to the percentages for both genders indicates there is not a significant difference)

| Product | Gender |  |
| :--- | :---: | :---: |
|  | Female | Male |
| Organic | $19.69^{\mathrm{A}}$ | $15.91^{\mathrm{B}}$ |
|  |  |  |
|  | Female | Male |
| Made in the USA | $17.67^{\mathrm{A}}$ | $17.19^{\mathrm{A}}$ |
|  |  |  |
|  | Male | Female |
| Cholesterol Free | $15.27^{\mathrm{A}}$ | $14.44^{\mathrm{A}}$ |

## Selection of products by gender (conitunes)

| Product | Gender |  |
| :--- | :---: | :---: |
|  | Male | Female |
| 0 Trans Fat | $14.83^{\mathrm{A}}$ | $13.62^{\mathrm{A}}$ |
|  |  |  |
|  | Male | Female |
| Gluten Free | $8.20^{\mathrm{A}}$ | $7.29^{\mathrm{A}}$ |
|  |  |  |
|  | Male | Female |
| High Oleic | $5.46^{\mathrm{A}}$ | $4.03^{\mathrm{B}}$ |
|  |  |  |
|  | Female | Male |
| Would not choose any option | $23.26^{\mathrm{A}}$ | $23.15^{\mathrm{A}}$ |

## Selection of products by generation age

- Percentages for a Generation Age is the proportion of respondents who selected a product within that generation (e.g., 22.25\% of Generation Z respondents selected Organic \& $16.48 \%$ selected Made in the USA - so the percentages along a row will not sum to 100\%)
- The letters next to the percentages denote significant differences (at $p$-value<0.05) between generations within a row (e.g., for Made in the USA: there was only a significant difference between Millennials \& Boomers because Millennials' percentage does not have a B \& Boomers' percentage doesn't have an A)

| Product | Generation Z | Millennials | Generation X | Boomers | Silent |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Organic | $22.25^{\mathrm{A}}$ | $21.51^{\mathrm{AB}}$ | $18.92^{\mathrm{B}}$ | $13.22^{\mathrm{C}}$ | $13.03^{\mathrm{C}}$ |
|  |  |  |  |  |  |
|  | Millennials | Silent | Generation X | Generation Z | Boomers |
| Made in the USA | $19.21^{\mathrm{A}}$ | $17.95^{\mathrm{AB}}$ | $17.91^{\mathrm{AB}}$ | $16.48^{\mathrm{AB}}$ | $16.08^{\mathrm{B}}$ |
|  |  |  |  |  |  |
|  | Generation Z | Boomers | Generation X | Millennials | Silent |
| Cholesterol Free | $16.57^{\mathrm{A}}$ | $14.86^{\mathrm{A}}$ | $14.86^{\mathrm{A}}$ | $14.18^{\mathrm{A}}$ | $13.03^{\mathrm{A}}$ |

## Selection of products by generation age (coninineed)

| Product | Generation Ages |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | Generation X | Generation Z | Millennials | Boomers | Silent |
| 0 Trans Fat | $14.81^{\mathrm{A}}$ | $14.58^{\mathrm{A}}$ | $14.18^{\mathrm{A}}$ | $13.72^{\mathrm{A}}$ | $13.25^{\mathrm{A}}$ |
|  |  |  |  |  |  |
|  | Generation Z | Millennials | Generation X | Boomers | Silent |
| Gluten Free | $12.12^{\mathrm{A}}$ | $10.46^{\mathrm{A}}$ | $7.60^{\mathrm{B}}$ | $4.48^{\mathrm{C}}$ | $3.63^{\mathrm{C}}$ |
|  |  |  |  |  |  |
|  | Generation Z | Millennials | Generation X | Boomers | Silent |
| High Oleic | $7.10^{\mathrm{A}}$ | $7.74^{\mathrm{A}}$ | $4.11^{\mathrm{B}}$ | $2.40^{\mathrm{C}}$ | $1.50^{\mathrm{C}}$ |
|  |  |  |  |  |  |
|  | Silent | Boomers | Generation X | Millennials | Generation Z |
| Would not choose any option | $37.61^{\mathrm{A}}$ | $35.24^{\mathrm{A}}$ | $21.79^{\mathrm{B}}$ | $12.71^{\mathrm{C}}$ | $10.89^{\mathrm{C}}$ |

## Selection of products by income

- Percentages for an Income is the proportion of respondents who selected a product within that income range (e.g., $17.36 \%$ of respondents who make $\$ 34,999$ and below selected Organic $\& 16.85 \%$ selected Made in the USA - so the percentages along a row will not sum to $100 \%$ )
- The letters next to the percentages denote significant differences (at $p$-value $<0.05$ ) between income ranges within a row (e.g., for Made in the USA: there was only a significant difference between \$35,000-\$99,999 \& $\$ 34,999$ and below because the percentage for $\$ 35,000-\$ 99,999$ does not have a B \& the percentage for $\$ 34,999$ and below doesn't have an A)

| Product | Income |  |  |
| :--- | :---: | :---: | :---: |
|  | $\$ 35,000-\$ 99,999$ | $\$ 100,000$ and above | $\$ 34,999$ and below |
| Organic | $18.36^{\mathrm{A}}$ | $17.70^{\mathrm{A}}$ | $17.36^{\mathrm{A}}$ |
|  |  |  |  |
| Made in the USA | $\$ 35,000-\$ 99,999$ | $\$ 34,999$ and below | $\$ 34,999$ and below |
|  | $18.64^{\mathrm{A}}$ | $16.85^{\mathrm{AB}}$ | $16.07^{\mathrm{B}}$ |
|  |  |  |  |
|  | $\$ 100,000$ and above | $\$ 34,999$ and below | $\$ 35,000-\$ 99,999$ |
| Cholesterol Free | $15.20^{\mathrm{A}}$ | $15.10^{\mathrm{A}}$ | $14.44^{\mathrm{A}}$ |

## Selection of products by income (cominean)

| Product | Income |  |  |
| :--- | :---: | :---: | :---: |
|  | $\$ 35,000-\$ 99,999$ | $\$ 100,000$ and above | $\$ 34,999$ and below |
| 0 Trans Fat | $14.85^{\mathrm{A}}$ | $14.54^{\mathrm{A}}$ | $12.94^{\mathrm{A}}$ |
|  |  |  |  |
| Gluten Free | $\$ 34,999$ and below | $\$ 35,000-\$ 99,999$ | $\$ 100,000$ and above |
|  | $8.29^{\mathrm{A}}$ | $7.61^{\mathrm{A}}$ | $7.24^{\mathrm{A}}$ |
|  |  |  |  |
| High Oleic | $\$ 100,000$ and above | $\$ 34,999$ and below | $\$ 35,000-\$ 99,999$ |
|  | $6.37^{\mathrm{A}}$ | $4.60^{\mathrm{B}}$ | $3.82^{\mathrm{B}}$ |
|  |  |  |  |
|  | $\$ 34,999$ and below | $\$ 100,000$ and above | $\$ 35,000-\$ 99,999$ |
| Would not choose any option | $37.08^{\mathrm{A}}$ | $33.39^{\mathrm{A}}$ | $32.48^{\mathrm{A}}$ |

## Selection of products by region

- Percentages for a Region is the proportion of respondents who selected a product within that region (e.g., $19.72 \%$ of respondents residing in the West selected Organic \& $19.00 \%$ selected Made in the USA - so the percentages along a row will not sum to $100 \%$ )
- The letters next to the percentages denote significant differences (at $p$-value<0.05) between regions within a row (e.g., for Organic: there was only a significant difference between West \& Midwest because the percentage for West does not have a B \& the percentage for Midwest doesn't have an A)

| Product | West | South | Northeast | Midwest |
| :--- | :---: | :---: | :---: | :---: |
|  | $19.72^{\mathrm{A}}$ | $18.25^{\mathrm{AB}}$ | $16.82^{\mathrm{AB}}$ | $15.64^{\mathrm{B}}$ |
| Organic |  |  |  |  |
|  | West | Midwest | South | Northeast |
|  | $19.00^{\mathrm{A}}$ | $18.20^{\mathrm{A}}$ | $17.26^{\mathrm{AB}}$ | $14.73^{\mathrm{B}}$ |
|  |  |  |  |  |
|  | South | Northeast | Midwest | West |
| Cholesterol Free | $15.87^{\mathrm{A}}$ | $14.73^{\mathrm{A}}$ | $14.40^{\mathrm{A}}$ | $13.87^{\mathrm{A}}$ |

## Selection of products by region (coniniused)

| Product | Region |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | South | Northeast | Midwest | West |
| 0 Trans Fat | $14.96^{\mathrm{A}}$ | $14.51^{\mathrm{A}}$ | $13.82^{\mathrm{A}}$ | $13.26^{\mathrm{A}}$ |
|  |  |  |  |  |
|  | Northeast | South | Midwest | West |
| Gluten Free | $8.33^{\mathrm{A}}$ | $8.21^{\mathrm{A}}$ | $8.04^{\text {AB }}$ | $6.45^{\mathrm{B}}$ |
|  |  |  |  |  |
|  | Northeast | South | Midwest | West |
| High Oleic | $5.28^{\mathrm{A}}$ | $5.00^{\mathrm{AB}}$ | $4.68^{\mathrm{ABC}}$ | $3.96^{\mathrm{C}}$ |
|  |  |  |  |  |
|  | Northeast | Midwest | West | South |
| Would not choose any option | $25.60^{\mathrm{A}}$ | $25.22^{\mathrm{A}}$ | $23.73^{\mathrm{A}}$ | $20.44^{\mathrm{A}}$ |

## Conclusions from the Selection Task

32-ounce bottle of soybean oil
Oil labeled Organic was more popular among Females, Generation Z, Millennials and Generation X

Oil labeled Gluten Free was more popular among Generation Z and Millennials

Oil labeled High Oleic was more popular among Generation Z, Millennials and those with an income greater than $\$ 100,000$

## Consumer Perceptions:

Taste, Protein Content, Healthfulness and Environmental Friendliness

## Product groupings

How would you group the following sources of protein for human consumption in term of their similarity to each other? (click and drag each item into one of the group boxes on the right; put items you feel are similar to each other in the same box; use as many or as few boxes as you like)

| Items | Group I | Group 2 |
| :---: | :---: | :---: |
| Chickpeas |  |  |
| Lentils |  |  |
| Beans |  |  |
| Mushrooms | Group 3 | Group 4 |
| Quinoa |  |  |
| Dairy |  |  |
| Beef |  |  |
| Pork |  |  |

Chicken
Eggs

## Peanuts

Almonds

## Conceptual product groupings

## Conceptual product groupings

## Which source of protein do you think tastes the best?

| Protein | Proportion of the sample |
| :--- | :---: |
| Chicken | $39.17^{\mathrm{A}}$ |
| Lentils | $25.92^{\mathrm{B}}$ |
| Beef | $23.67^{\mathrm{B}}$ |
| Chickpeas | $6.42^{\mathrm{C}}$ |
| Soy | $4.83^{\mathrm{C}}$ |

- Overall, Soy protein was not perceived to be the best-tasting as often as animal products and Lentils
- There was not a significant difference in taste perceptions between Soy and Chickpeas

## Which source of protein do you think is highest in protein per serving?

| Protein | Proportion of the sample |
| :--- | :---: |
| Beef | $32.67^{\mathrm{A}}$ |
| Lentils | $27.67^{\mathrm{A}}$ |
| Chicken | $20.00^{\mathrm{B}}$ |
| Chickpeas | $11.42^{\mathrm{C}}$ |
| Soy | $8.25^{\mathrm{C}}$ |

- There is a lack of public knowledge about the high protein content in Soy protein
- Lentils were selected more than Chicken
- This may provide an opportunity for comparison in consumer communications

## Which source of protein do you think is the healthiest?

| Protein | Proportion of the sample |
| :--- | :---: |
| Lentils | $29.83^{\mathrm{A}}$ |
| Beef | $27.83^{\mathrm{A}}$ |
| Chicken | $24.83^{\mathrm{A}}$ |
| Chickpeas | $10.17^{\mathrm{B}}$ |
| Soy | $7.33^{\mathrm{B}}$ |

- The USDA MyPlate recommends consuming a variety of foods in the protein group, including soy products
- There is an opportunity to communicate the healthfulness of soy products as a source of protein

| Protein | Proportion of the sample |
| :--- | :---: |
| Soy | $49.75^{\mathrm{A}}$ |
| Chickpeas | $23.92^{\mathrm{B}}$ |
| Chicken | $10.00^{\mathrm{C}}$ |
| Lentils | $9.25^{\mathrm{C}}$ |
| Beef | $7.08^{\mathrm{C}}$ |

- Soy was overwhelmingly selected as the most environmentally friendly source of protein
- There is an opportunity to highlight sustainability further while providing consumer education about the protein content and healthfulness of soy products

| Most Important | Proportion of the sample |
| :--- | :---: |
| Providing alternative options for protein <br> for human consumption | $30.58^{\mathrm{A}}$ |
| Providing protein for raising dairy, eggs, <br> beef, pork, and chickens | $23.50^{\mathrm{B}}$ |
| Providing improved nutrition to staple <br> foods | $15.42^{\mathrm{C}}$ |
| Providing nutrition to low-income <br> countries | $14.25^{\mathrm{C}}$ |
| Providing alternative options for plastic |  |
| use | $8.17^{\mathrm{D}}$ |
| Providing alternative options for biofuel |  |
| use |  |

- Soy as a source of protein was most important for consumers
- Combined, "Providing alternative options for protein for human consumption" and
"Providing protein for raising dairy, eggs, beef, pork and chickens" were selected by $54 \%$ of consumers
- Nutrition, broadly, was more important than providing plastic and fuel alternatives

## Which of the following options do you think is the LEAST important for soybeans grown in the USA?

| Least Important | Proportion of the sample |
| :--- | :---: |
| Providing alternative options for <br> plastic use | $28.58^{\mathrm{A}}$ |
| Providing alternative options for <br> biofuel use | $19.67^{\mathrm{B}}$ |
| Providing protein for raising dairy, <br> eggs, beef, pork, and chickens | $14.67^{\mathrm{C}}$ |
| Providing nutrition to low-income <br> countries | $12.58^{\mathrm{C}}$ |
| Providing improved nutrition to staple <br> foods | $12.33^{\mathrm{C}}$ |
| Providing alternative options for <br> protein for human consumption | $12.17^{\mathrm{C}}$ |

- Soy as a source of bioplastic or biofuel was least important for consumers
- Combined, "Providing alternative options for plastic use" and "Providing alternative options for biofuel use" were selected by $48 \%$ of consumers

## Conclusions from Consumer Perceptions

Consumers associate soybeans more with chickpeas, beans, lentils, quinoa and mushrooms than they do animal-based proteins.

Though soy is not typically considered the healthiest or the tastiest protein source nor is it considered to be the highest in protein, it is considered the most
environmentally friendly.

Providing alternative options for protein for human consumption is considered most important for U.S. soybeans, while providing alternative options for plastic use is considered least important.

## Who might switch to plant-based chicken tenders?

## Conclusions from Market Exploration

Of the consumers who have not purchased soy protein in the past 6 months, $12-15 \%$ would be at least somewhat likely to substitute to the plant-based alternative if the price was the same.

Relative to current consumption patterns, baby boomers indicate an interest in substituting toward soy protein products.

Interest in substitution is relatively consistent across plant-based product categories.
